

Caring Dads Group

in English

Our program offers a specialized group counseling program for fathers focusing on addressing intimate relationship violence and its impact on children. Please note that this is not a parenting group. During the 17-week group sessions, fathers can:

- Explore the dynamics of intimate relationship violence within the context of power and control.
- Increase awareness of the effects of relationship violence on children.
- Develop skills for regulating emotions and fostering healthier relationships with both their children and the children's mothers.
- Acquire problem-solving strategies for handling challenging situations and managing relationship difficulties.
